

Enterprise-Grade Virtual Device Management for  
Modern Businesses

# Corporate smartphones problems

## Cost Burden

- Corporate devices (€300-1000 per employee)
- Corporate devices maintenance prices
- Replacement of lost/stolen/broken devices
- EMM licenses (€4-20 per device per month)
- Asset management & logistics
- Potential losses caused by data leaks

## Security Problems

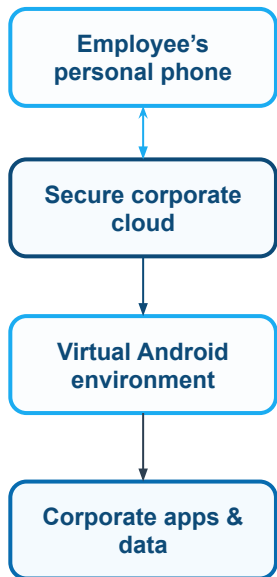

- 71% of data breaches start from endpoints
- Lost/stolen devices risks
- Unauthorized app installations
- Uncontrolled data sharing between apps
- Corporate data might be accessed through security breaches
- Lost/stolen phones might be unlocked with solutions like Cellebrite
- No ability to view app interaction replays
- No ability to control apps behavior

## Inconvenience to employees

- The need to carry multiple phones
- Privacy concerns (in case of BYOD)

These challenges cost enterprises €500-1500 per employee annually in direct costs, plus hidden expenses in security risks and productivity loss.

# Introducing Actinis: Enterprise Virtual Device Platform

## 🌐 How It Works:

- Apps run on virtual Android devices in secure cloud
- Employees access via any device (iOS/Android/Desktop)
- Native-like experience through proprietary streaming and full system integration
- Zero corporate data footprint on physical devices
- No need for corporate smartphones anymore - migrate to BYOD model

See the demo: <https://youtu.be/QdxSGCHXcpQ>

## ⚡ Revolutionary Technology

- Low bandwidth (10-200 kbps)
- Native-like performance
- Full system integration
- Ability to change 3rd-party apps behavior (e.g. lock some features)

## 🛡️ Enterprise-Grade Security

- Encrypted isolated containers
- Instant remote wipe or lock
- Built-in security controls
- Ability to view corporate apps interactions replays

## 👛 Business Ready

- Private cloud deployment option - no data ever leaves corporate servers
- Custom security policies
- Directory service integration
- Cross-platform compatibility
- Instant device provisioning

First-to-market solution that eliminates need for corporate devices while enhancing security and reducing costs

# 3rd-Party App Customization

## Transform Popular Apps for Enterprise

- WhatsApp: Disable media saving
- Telegram: Block forward function
- Gmail: Restrict attachments
- Chrome: Control download capabilities
- Any Android app: custom restrictions

## Example Modifications

- “Save image” → Disabled
- “Forward message” → Limited to internal only
- “Share via...” → Custom allowed apps list
- “Screenshot” → Blocked
- “Copy text” → Controlled by policy

## Enterprise Control

- Disable unwanted features
- Remove sensitive buttons
- Modify app behavior
- Enforce security policies
- Add corporate watermarks

Customize any Android app without vendor involvement or source code access

# Transform Your Enterprise Mobility Management

## Cost Efficiency

- Eliminate corporate device costs (€500-1500/employee)
- Lower IT support overhead
- Lower asset management and logistics costs
- Minimize security incidents costs

€ 40,000-120,000 direct annual savings for 100 employees

## Enhanced Security

- Zero data on physical devices
- Encrypted isolated environments
- Instant remote wipe/lock
- No uncontrolled data share between apps

95% reduction in endpoint security risks

## Operational Excellence

- Move everything to a new device in 2 minutes
- Virtual environments allow customization beyond what is possible with physical devices
- Cross-platform compatibility
- Native-like performance
- Seamless BYOD integration
- No inconvenience for employees anymore

**Instant** deployment compared to hours of traditional device setup and configuration

## Future-Proof Solution

- Scalable architecture
- Private cloud option
- Custom security policies
- Continuous updates
- API integration ready

**Ready** for evolving enterprise mobility needs

Transform your enterprise mobility with immediate deployment, enhanced security, and significant cost reduction potential

# Enterprise-Ready Deployment

## Isolated Environments

- Individual encrypted containers per device
- Complete separation between instances
- App-level isolation and control
- Customizable security policies per app

## Data Protection

- Zero data on physical devices
- End-to-end encryption
- Secure cloud infrastructure
- Real-time data wiping/locking

## Access Control

- Multi-factor authentication
- Role-based access management
- Granular permission settings
- Session monitoring and control

## Compliance & Audit

- Detailed activity logging
- Corporate apps interaction recording
- Access attempt monitoring
- Compliance policy enforcement

## Additional Security Features

- Built-in trackers and ads blocking
- Traffic encryption
- Secure file transfer
- GPS and other sensors data protection
- Ability to modify behavior of 3rd-party apps

Built on custom-developed Android OS with security-first architecture

# Enterprise-Grade Security Architecture

## Enterprise Integration

- Directory service support
- Single Sign-On compatibility
- Corporate network integration
- Secure data flow configuration

## Management Features

- Central admin dashboard
- User management console
- Policy management
- Usage monitoring
- Real-time status overview

## Enterprise Support

- Technical documentation
- Deployment assistance
- Admin training
- Priority support channel
- Integration guidance

Ready for production deployment with full enterprise support

# Cost-Effective Enterprise Solution

## Traditional EMM + Devices

- Corporate device cost (€300-1000 per employee)
- EMM license (€4-20 per device per month)
- Device maintenance & replacement
- IT support hours
- Multiple tools for cross-platform
- Physical device storage & handling
- Device shipping & logistics
- Device replacement requires new long set up process

## Cost Optimization Areas

- Hardware elimination
- License consolidation
- Support cost reduction
- Deployment efficiency
- Global scalability

## Actinis Solution

- No corporate device needed - employee uses personal device
- Single platform license
- Zero maintenance costs
- Reduced IT overhead
- One solution for all platforms
- Instant global deployment
- Instant migration of all data to a new device
- Access virtual device from multiple physical devices

## Additional Value

- Instant scaling up/down
- No device lock-in
- Reduced security risks
- Simplified compliance
- Future-proof platform

Transform device costs into strategic advantage

# Pilot program

## Pilot Scope

- Duration: 1-3 months
- Users: Up to 30 employees
- Full feature access
- Enterprise support included

## What We Provide

- Full initial setup assistance
- Admin panel access
- Security configuration
- Technical documentation
- Training materials
- Priority support

## Success Metrics

- Deployment speed
- User experience feedback
- Security compliance
- Integration effectiveness

## Your Commitment

- Pilot coordinator
- Test group selection
- Feedback sessions
- Use case documentation

Start your pilot today: Contact us at [artem@actinis.io](mailto:artem@actinis.io)

# Technology Leadership Team

## Artem Smirnov

### Founder, CEO

- 12 years Android apps development
- 10 years Android OS development
- 10 years EMM solutions development
- Core technology architect

## Ivan Nedelin

### Founder, CMO

- Marketing and business development
- Enterprise growth strategy
- Market positioning
- Business partnerships

## Stanislav Zakharov

### Founder, CPO

- Product management
- Customer operations
- User experience
- Solution architecture

## Company Overview

- Founded: 2020
- Based: Tartu, Estonia
- Focus: Enterprise mobility solutions
- Stage: Advanced product development

## Key Achievements

- Proprietary streaming technology
- Ultra-efficient data transmission
- Full device integration
- Enterprise-grade security

# Start Your Enterprise Transformation

## Next Steps

- Initial discussion
  - Review your current setup
  - Identify key requirements
  - Define success metrics
  - Outline pilot scope
- Pilot program
  - Up to 30 users
  - 1-3 months duration
  - Full feature access
  - Dedicated support
- Enterprise rollout
  - Seamless scaling
  - Custom configuration
  - Team training
  - Ongoing support

## Schedule Your Demo

- Email: [artem@actinis.io](mailto:artem@actinis.io)
- Web: <https://actinis.io>

## Why Start Now?

- Be first to leverage next-gen enterprise mobility
- Transform your device management approach
- Enhance security while reducing costs
- Start pilot within days

Book your personal demo today

# Thank you!
